ABSTRACT

Title: "BAKIT KAMI GANITO?" Roots of Students' Behaviour: A Grounded Theory

Researcher: Alfred D. Tejedor

Jinver V. Cenita

Boyet G. Dile

Subject Teacher: Mary Ann B. Gatpandan

School: Gen. E. Aguinaldo National High School – Bailen

School Year: 2016-2017

The students' behaviour have different roots wherein the goal of this study is to find and understand those roots. Home environment is where the student influenced by their family and most of all this is where the untold stories emerged that contributed a lot to their behaviour. School environment includes the influence of peers to student. The influence of peers is strong that can encourage the child in any aspects. This environmental factors among students is very significant to the study. There are two kinds of behaviour, the positive and negative behaviour. Positive behaviour can make the child excel on his study and enable to reach the goal in life while negative behaviour is a blockage to the students' perspectives.

This qualitative study used Grounded Theory in succession to deeply comprehend the roots of a students' behaviour. After conducting the interviews, we proceed to the coding process especially the Litchman's 3C's. We, researchers ended up to a theory of behaviour. The home and school environment is the two
