Humans curiosity makes people invent and explore new things. From a static technology to a high standard one. Technology is a big development for every humans life and it can be used in so many different ways like, in investigations, scientific calculation and also in our education.

Most of us used technology in daily life. Because of the modernization and the widely spread of technology, there are so many different inventions and applications appeared. And, online games is one the applications wherein it is the most popular game. And, in having too much involvement in this, sometimes, the gamers did not control themselves in playing and already controlled by this games. Furthermore, because of having no proper time management in playing online games and until they found themselves as a online game addicts.

This phenomenological study described the experiences of the online game addicts.
